

Smart Civic Resolution Platform

Comprehensive UI, UX & System Layout Design Specification

1. Executive Summary & Vision

The **Smart Civic Resolution Platform** is a modern, enterprise-grade public administration software suite engineered to bridge the gap between citizens and municipal government authorities.

The platform provides a dual-portal architecture:

- 1. Citizen Resolution Portal:** A clean, accessible web application empowering citizens to file location-aware civic grievances (e.g., water leakages, garbage overflows, street light outages, road potholes), attach site photo evidence, and track real-time resolution progress.
- 2. Government / Admin Administration Portal:** A streamlined, professional, and trustworthy administration interface for municipal officials, department leads, and field inspectors to monitor resolution queues, assign field officers, update statuses, verify photo proof, and analyze municipal operations.

2. Global Design System & Visual Guidelines

2.1 Color Palette

The platform adheres to a modern, calm, and official government color system. Large, overwhelming, or aggressive red/orange/yellow backgrounds are intentionally avoided in favor of subtle pastel indicators and dark navy accents.

Palette Role	Hex Code	Usage Context
Primary Navy	<code>`#123B5D`</code>	Top sticky navbar, primary buttons, major headings, branding
Secondary Accent	<code>`#2563EB`</code>	Interactive highlights, links, active indicators
Background Surface	<code>`#F8FAFC`</code>	Main application backdrop, slate container fill
Card / Container Fill	<code>`#FFFFFF`</code>	Content cards, data tables, modal dialog windows
Primary Text	<code>`#172033`</code>	Page titles, table headers, key content strings
Secondary Text	<code>`#64748B`</code>	Metadata, subtitles, timestamps, field labels
Borders & Dividers	<code>`#E2E8F0`</code>	Card borders, table gridlines, input outlines

2.2 Status Color Mapping (Subtle Pastels)

Status	Background	Text Color	Border Color	Concept / Meaning
Submitted	#F1F5F9	#475569	#CBD5E1	Newly logged by citizen
Verified	#E0F2FE	#0369A1	#BAE6FD	Reviewed by admin queue
Assigned	#F0F5FF	#1D4ED8	#C7D2FE	Assigned to department officer
In Progress	#FFFBE6	#B45309	#FEF08A	On-site resolution underway
Resolved	#F0FDF4	#166534	#BBF7D0	Issue resolved with photo proof
Closed	#F8F AFC	#64748B	#E2E8F0	Officially verified & archived
Rejected	#FEF2F2	#991b1b	#FECACA	Invalid or duplicate submission

2.3 Typography Scale & Font Hierarchy

- **Font Family:** `Inter`, `Plus Jakarta Sans`, system-ui, sans-serif
- **Page Titles:** `24px – 28px` (Font Weight: `800`, Line Height: `1.2`)
- **Section Headers:** `18px – 20px` (Font Weight: `700`, Line Height: `1.3`)
- **Body & Table Text:** `14px – 15px` (Font Weight: `500/600`, Line Height: `1.5`)
- **Metadata & Subtitles:** `12px – 13px` (Font Weight: `500`, Line Height: `1.4`)

3. Government / Admin Portal Architecture

3.1 Top Navigation Bar Layout

The Government / Admin dashboard utilizes a fixed, sticky horizontal top navigation bar, eliminating bulky vertical sidebars to maximize vertical screen real estate for data tables and maps.

- **Left Section:** Civic emblem (■), application name ("Smart Civic Resolution"), and subtitle ("Government Administration Portal").

- **Center Section:** Navigation items (`Dashboard`, `Complaints`, `Departments`, `Officers`, `Notifications`). Active routes feature a subtle `#123B5D` bottom border and `#F1F5F9` background highlight.
- **Right Section:** Real-time notification bell with unread badge counter, official profile trigger, and logout action button.
- **Responsiveness:** Automatically converts into a sleek hamburger menu on mobile/tablet viewports (< 860px).

3.2 Dashboard Main Page Wireframe & Sections

4. Key Interactive Workflows & Modals

4.1 Complaint Details Modal (Two-Column View)

When an administrator clicks **View** on any complaint row, a comprehensive inspection dialog opens:

- **Left Column:**
 - Issue ID, Title, Category, and Description.
 - Reported Location, Exact Address, Coordinates, and Embedded Leaflet Map (``MapView``).
 - Citizen Verification info (Registered Resident Account, Contact Email).
- **Right Column:**
 - Site Evidence Images (Before & After Resolution Proof).
 - Status Progress Timeline (``ComplaintTimeline``).
 - Official Remarks & Comment Log (``onAddComment``).

4.2 Field Officer Assignment Workflow

- **Trigger:** Click ****Assign Officer**** on any unassigned ticket.
- **Form Fields:**
 1. **Department Select:** Roads, Electricity, Sanitation, Water & Drainage, Traffic, Parks.
 2. **Officer Name Select:** Dropdown list of verified field inspectors (e.g., Rajesh Kumar, Vikram Singh).
- **Feedback:** Instant inline success toast and real-time state synchronization via ``assignOfficer()``.

4.3 Resolution Proof & Status Update Workflow

- **Trigger:** Click ****Update Status****.
- **Form Fields:**
 1. **New Status Selection:** Submitted, Verified, Assigned, In Progress, Resolved, Closed, Rejected.
 2. **Update Remarks:** Text area for official resolution comments.
 3. **Resolution Proof Upload:** Image capture & file input powered by ``ImageCaptureInput`` and ``uploadImageApi()``.

5. Summary of Frontend Engineering Standards

1. **Zero Breaking Backend Changes:** Maintains 100% compatibility with existing REST API endpoints, JWT authentication tokens, MongoDB models, and context hooks (``useAuth``, ``useComplaints``).
2. **Dynamic Data Calculations:** Statistics cards dynamically compute values directly from actual state datasets.
3. **Accessibility & Usability:** Clean contrast ratios, legible typography, compact button targets, touch-friendly mobile layouts, and clear visual hierarchy.
